Patrol Captain Sloan,

I just need to note one other thing.

[USFS Special Agent] told me this matter was not going away and that the state police wanted to talk to me. He was insistent in that phone call. Bullish.

And now no one will tell me who these state police officers are. I cannot speak to the people who apparently want to speak to me if no one gives me their contact information.

I find it highly unusual I would need to file a public records request with multiple agencies to determine the identity of the men who came here to intimate me on March 24, 2026.

And I want to remind you of one other thing. You have stated this is your jurisdiction. That means you are responsible for my safety here.
