Good morning, [Volunteer Services Lead]!

Thank you so much for the detailed explanation on the different ranger roles. So Seasonal Ranger Assistant it is. ��

Hopefully I get to help guests at the gatehouse if I land that job! I think I would be amazing at it. I don't know why it appeals to me so much -- I guess because a gate attendant helped me in Brookings and it kind of elevated the position in my mind.

I'm more than happy to do any maintenance role, just want to note I have little experience with... Well maintenance. I lived on computers my whole life! So if it involves, like, maintaining equipment... Probably I would be very bad at this unless someone really wanted to mentor me. And I am all about learning these kinds of skills at this stage of my life (never had an interest in my younger days so I find this evolution of myself kind of interesting).

Don't mind hard work of course. I'm replacing all the traction things at Tugman this week and that's a lot more work than it appears from the outside! But I'm loving it.

I'm really excited about coming to Honeyman. I just have a really good feeling about it. And I love working with [Tugman Volunteer Services Lead] also so I feel like maybe I found my place for part of the year!

Sam
